

Preventive Drug Benefit for HSA Plans

Effective January 1, 2024

Premium formulary

Your coverage includes a preventive drug benefit. This means that preventive drugs (medications to help prevent chronic conditions and illnesses) are covered outside of your plan's deductible. Instead, you will pay the applicable copayment or coinsurance amount.

Over-the-counter products are not included in this benefit.

This is a list of the most commonly prescribed preventive drugs. Limitations and restrictions may apply. Brand-name drugs have a capital letter; all others are generic drugs.

Coverage for Over-the-Counter Medications

Your health plan includes coverage for certain generic over-the-counter (OTC) medications. This means cost savings on the essentials in your medicine cabinet.

Here's how it works:

- › Use the online lookup tool at harvardpilgrim.org/rx to see which OTC medications you take are covered.
- › Ask your provider to write a prescription for the covered medication, for up to a 90-day supply.
- › Bring the prescription to any in-network pharmacy* so that the pharmacist can give you the proper medication.
- › You pay Tier 1 cost sharing instead of the retail price. If you have an HSA plan, you pay either our discounted rate or the retail cost, whichever is lower, until you meet your deductible, and then Tier 1 cost sharing applies.

There's another advantage: because your provider will be giving you a prescription for the OTC medications you take, your medical records will have a more complete medication history.

Below are the types of OTC medications that are covered along with a complete listing by medication:

Type of Therapy	Purpose
 Cough, cold, allergy	› Antitussive (cough suppressant) › Expectorant › Nasal decongestant › Antihistamine › Nasal spray
 Dermatology	› Anti-fungal › Poison ivy
 Eyes (ophthalmic)	› Dry eye › Allergy
 Gastrointestinal	› Anti-parasite › H2 blocker (antacid) › Laxative
 Pain	› Anti-inflammatory

*Visit harvardpilgrim.org/rx to find in-network pharmacy locations near you.
